Volume 17, Issue 6 — June 2023

Research Articles

1.

An Approach for Detecting and Preventing DDoS Attacks in Campus Networks

M. Mehdi

Keywords: DDoS attacks, intrusion detection system, Snort, campus network security, anomaly detection, network performance, cybersecurity

2.

An Adenovirus Vector-Mediated RNA Interference Efficiently Inhibits Rat Stim1 Expression in Vascular Smooth Muscle Cells and Rat Carotid Artery

Bei Liu, Bin Zhang, Lixia Yang, Ruiwei Guo

Keywords: RNA interference, adenovirus vector, stim1, vascular smooth muscle cells, gene knockdown, store-operated calcium influx, carotid artery

3.

The Impact of Teaching Fast Reading on Enhancing Students' Fluency and Comprehension in Reading

Hojatollah Dastanpour

Keywords: fast reading, reading comprehension, reading fluency, English language learning, educational strategies

4.

The Study of Relationship between Velocity and Drag Coefficient of Swimmer using Computational Fluid Dynamics

Ali Hooshmand Aini

Keywords: Computational Fluid Dynamics, Drag Coefficient, Swimmer Velocity, Fluid Mechanics, Sports Science

5.

The Effects Of Organizational Citizenship Behavior On Teachers Working At Private Schools

Ebru Kadioğulları, Ali Ilker Gümüşeli

Keywords: Organizational Citizenship Behavior, Job Performance, Job Satisfaction, Work-Family Conflict, Structural Equation Modeling

6.

Using Six Sigma Methodology in Developing Accounting Information System: A Proposed Framework

Yasmine Magdi Ragab

Keywords: Six Sigma, Accounting Information System, Process Improvement, Decision Making, Quality Control

7.

Olfactory Receptor Gene Near HLA-F Associated with Type 1 Diabetes: A Confirmatory Case-Control Study

Mohamed Jahromi, Adel Ahmed

Keywords: Type 1 Diabetes, Olfactory Receptor Gene, HLA-F, Single Nucleotide Polymorphism, Genetic Prediction
